

## **DKU-5 DATA CABLE INSTALLATION GUIDE**

### ***1. AUTO INSTALLATION OF USB DRIVER & PC Suite***

A. When you insert the DKU-5 cable, your Windows XP should detect this new hardware, and the “Welcome to the Found New Hardware Wizard” window will turn up, choose the default “Install the hardware automatically (Recommended)

B. Insert the Driver CD with “DKU-5” printed on cover, close its auto window, click “Next” on the “Welcome to the Found New Hardware Wizard” window, wait for a few second, and click “Finish”. The driver is installed successfully.

C. Install PC Suite: re-insert the CD, wait for a few second, a window of instructions will turn up, click “Install PC Suite”, and follow the prompts, the PC Suite should be installed, and your cable should be ready to be enjoyed.

Note: If you Windows version is earlier than Windows 2000 Service Pack 3, please choose the PC Suite 5.8.
