

RB-880/RB880d IrDA Dongle INSTALLATION GUIDE

1. Turn on your PC, do NOT insert the dongle into USB port, insert the driver CD into CD Rom; if it does not start automatically, please locate the setup.exe file in your CD ROM, double click it
2. Then step by step the installation will be completed, please note that a warning message about “the driver is not compatible with Windows” would appear, please ignore and continue
3. Insert the IrDA dongle into USB port, the system will automatically check and finish the whole installation then it may be used

Supported Operating System: Windows 98, 2000, XP; does NOT fit Vista

Hints: for IrDA wireless connections, the two parties must be really close (say less than 5 cm), and at a certain angle may be required so please just try to find the best angle.

Thank you and enjoy your purchase!
