

LG KG90 M800 Data Cable Installation Instructions

1. If you have installed anything unsuccessfully, please uninstall everything installed;
 2. Insert the driver CD in to CD Rom, WITHOUT connecting the cable or phone,
 3. The CD will normally start automatically, if not, please go into the CD and click 'setup' or 'install' etc,
 4. The Software and USB driver will be installed together, and you may insert your cable with the phone to use it

 5. *if the PC does not seem to see your phone, please right click 'modem'-->properties in Control Panel/System/Hardware/ Device Manager, and find the COM value of the modem (e.g. 4);*
 6. *Launch the Samsung PC Studio, in 'settings', there is a interface for you to set the same COM value (e.g. 4) you just found, and it should work from then on...*

 7. The other possible reason for not connecting is that your phone's settings stopping the phone from connecting with data cable, e.g., you may have to go into the connectivity menu in the phone and change it from the memory card to the data cable.

 8. Please note, this cable does not have IC so when plugged in USB by itself, there will be NO 'Found New Hardware' Window turning up, unless you plug in with your phone which is only recommended AFTER driver and software installed OK.
- Please note: The instructions here may only be used for information only, the actual installation might not happen exactly as instructed, due to the product development, and various settings of PCs, and the software versions etc.
 - Compatible with: LG U310, U-310, VX8500, VX-8500, KG800, KG-800, KG810, KG-810, CHOCOLATE FLIP, VX8600, VX-8600, VX9900, VX-9900, KE970 SHINE, KG90, KG-90. LX150, LX-150, Chocolate(BLACK, WHITE AND PINK) mobile phones...
